29	How Are We Different?

"This airlift standing desk lets me adjust it to any height I want, so I can view my computer screens at my exact eye-level which is great for my neck and posture."

Why Choose an AIRLIFT® Desk?

More than ever, workers want the ability be active at the office. Sedentary behaviors (like excessive sitting) are associated with a wide range of health factors, including obesity, diabetes, and cardiovascular risk. The benefits of getting more activity by standing in the workplace are similarly real. Standing periodically can reduce back pain for some users. Moreover, standing burns more calories than sitting. As we strive to change our lifestyles for the better, we should change our workplaces with them.

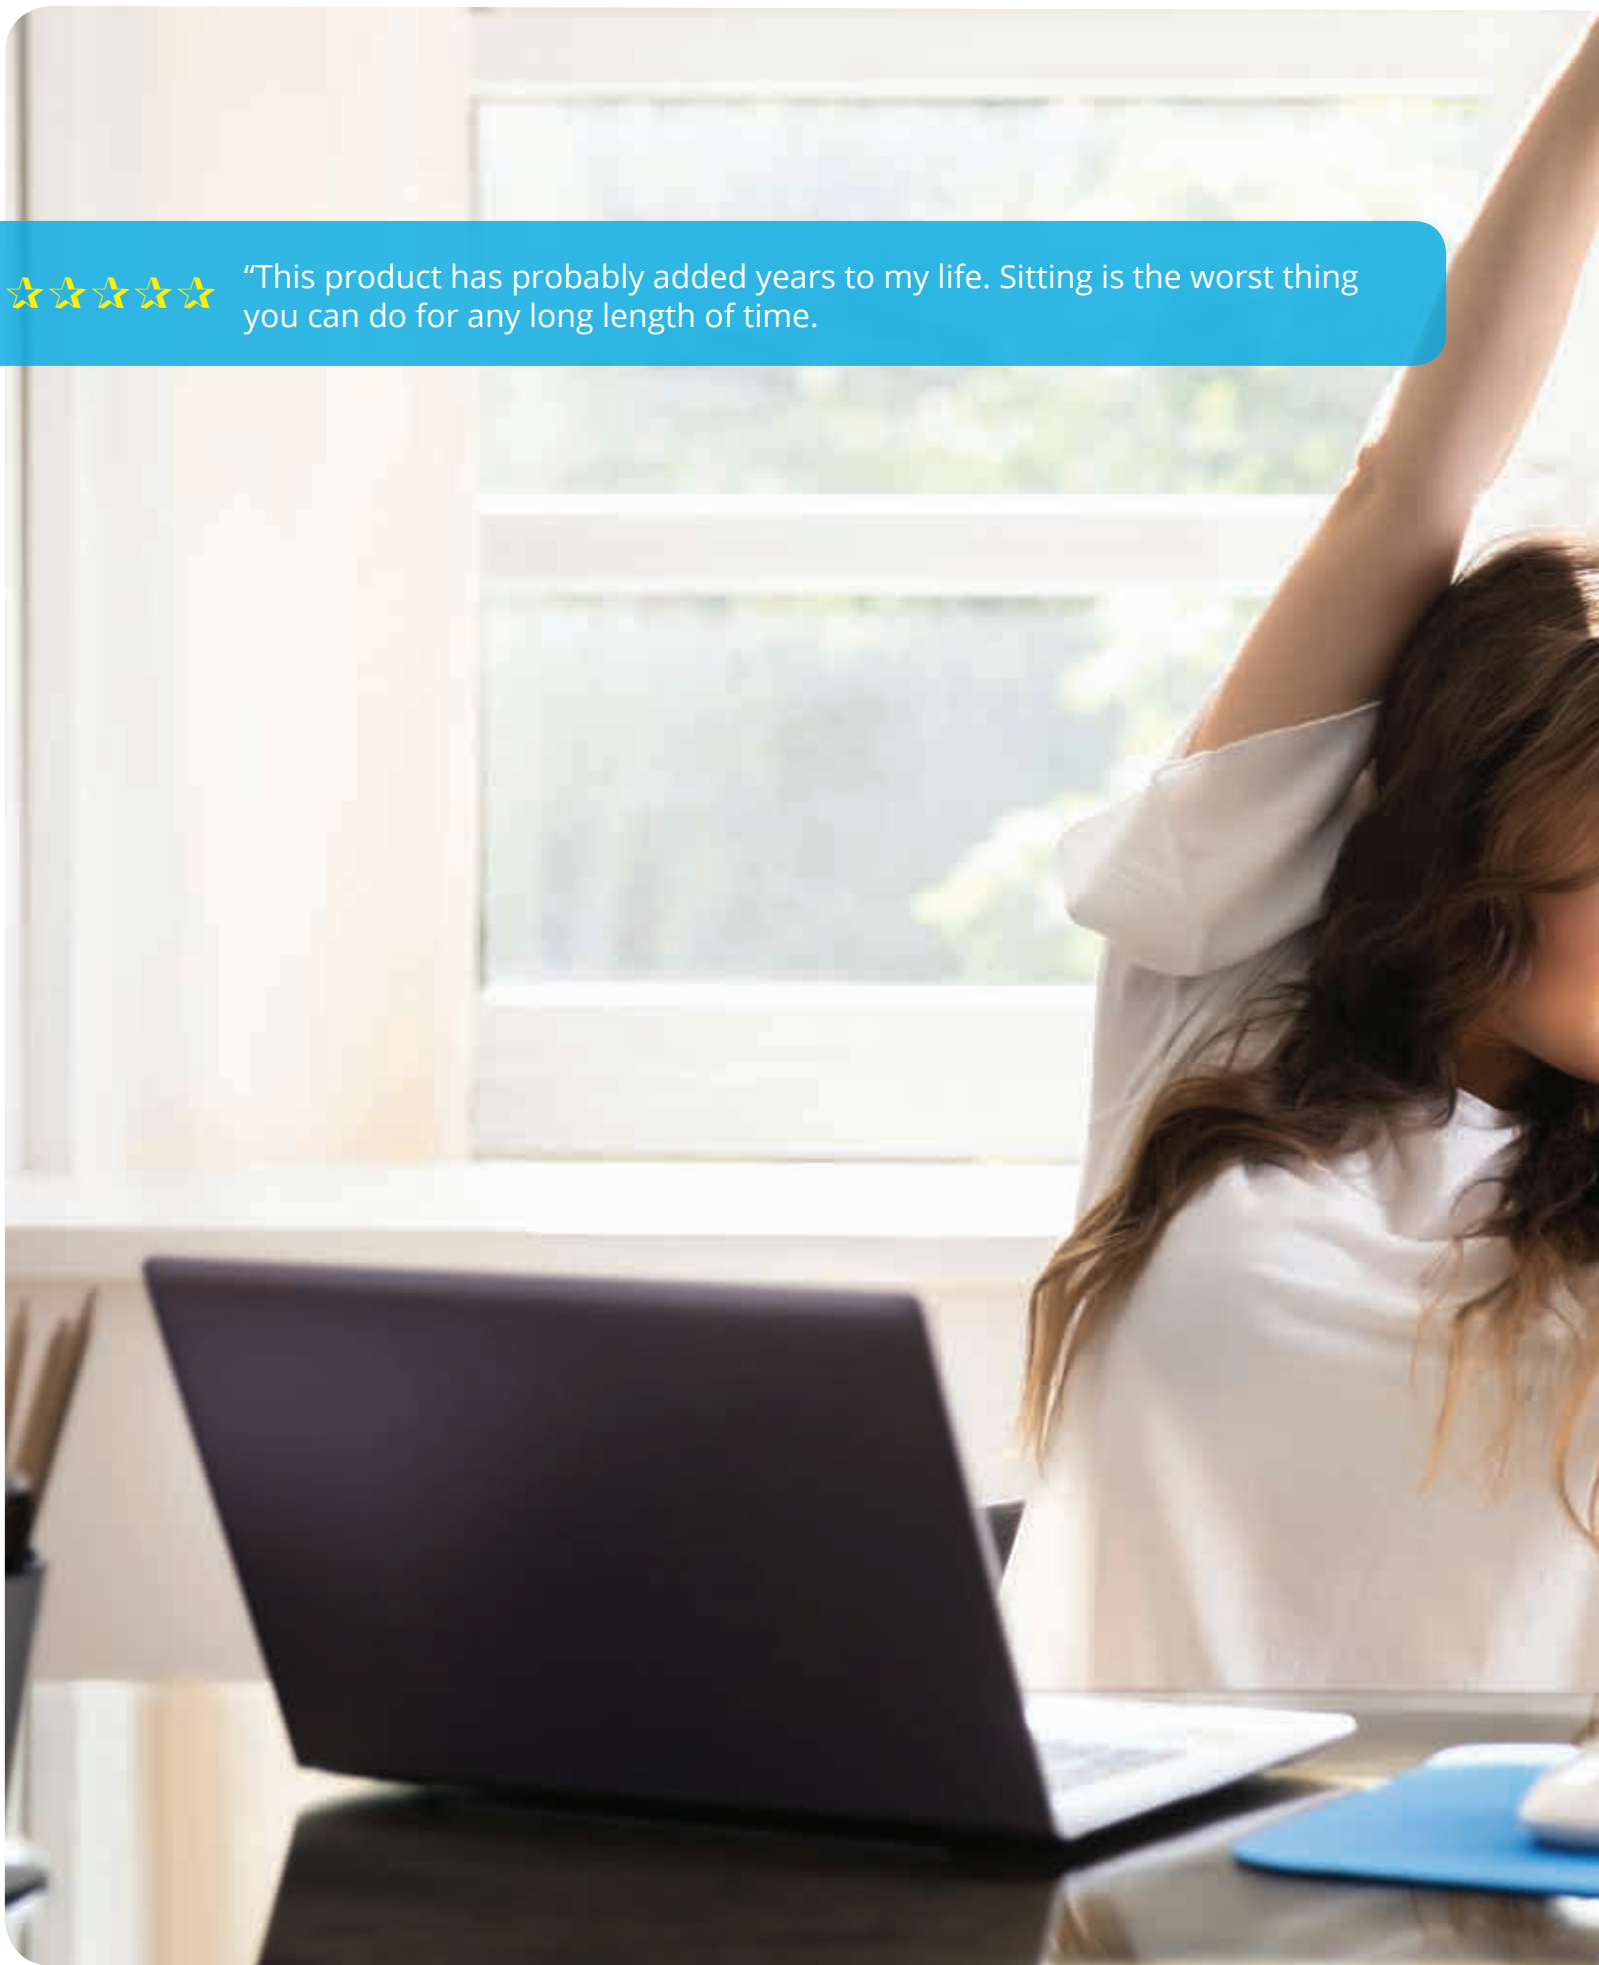

Seville Classics launched AIRLIFT® in 2017 to make it easy for institutions and individuals to enjoy those benefits. Our mission is to provide top-tier quality height-adjustable workspaces for everyone. We've added 20 new desks and 5 new accessories this year for the variety your school, government office, or business needs. Enjoy a full spectrum of sit-stand mobile desks, standing desk converters, electric standing desks.

OFF65872

OFF65873

Yes, the office space is changing.
Change with it.
Live well. **Live AIRLIFT®**

"This product has probably added years to my life. Sitting is the worst thing you can do for any long length of time."

Health Benefits

Get active with the AIRLIFT® series of height-adjustable desks!

Our desks are designed to promote active behavior at home and at the office by making it possible to adjust between sitting and standing throughout the day without losing productivity. Sit-to-stand desks have been shown to reduce sedentary behavior in the workplace when they're available. Give yourself the opportunity to stand up while working and improve your health little-by-little each day. Stand up for your health.

Go **AIRLIFT®**

Education

Corporate Office

Government

Where to Use

Government

Outfit meeting rooms and offices with versatile, height-adjustable, sit-to-stand desk options.

Corporate Office

Easily add height adjustability to a cubicle with a sit-to-stand workstation, or upgrade the office with an electric height-adjustable standing desk.

Home Office

Turn any room into a place of business with a pneumatic, mobile, height-adjustable desk or stationary electronic height-adjustable standing desks.

Education

Podium-style tilting desk tops that roll, or fast-lifting pneumatic mobile desks make an excellent addition to classrooms at any level of study.

Healthcare

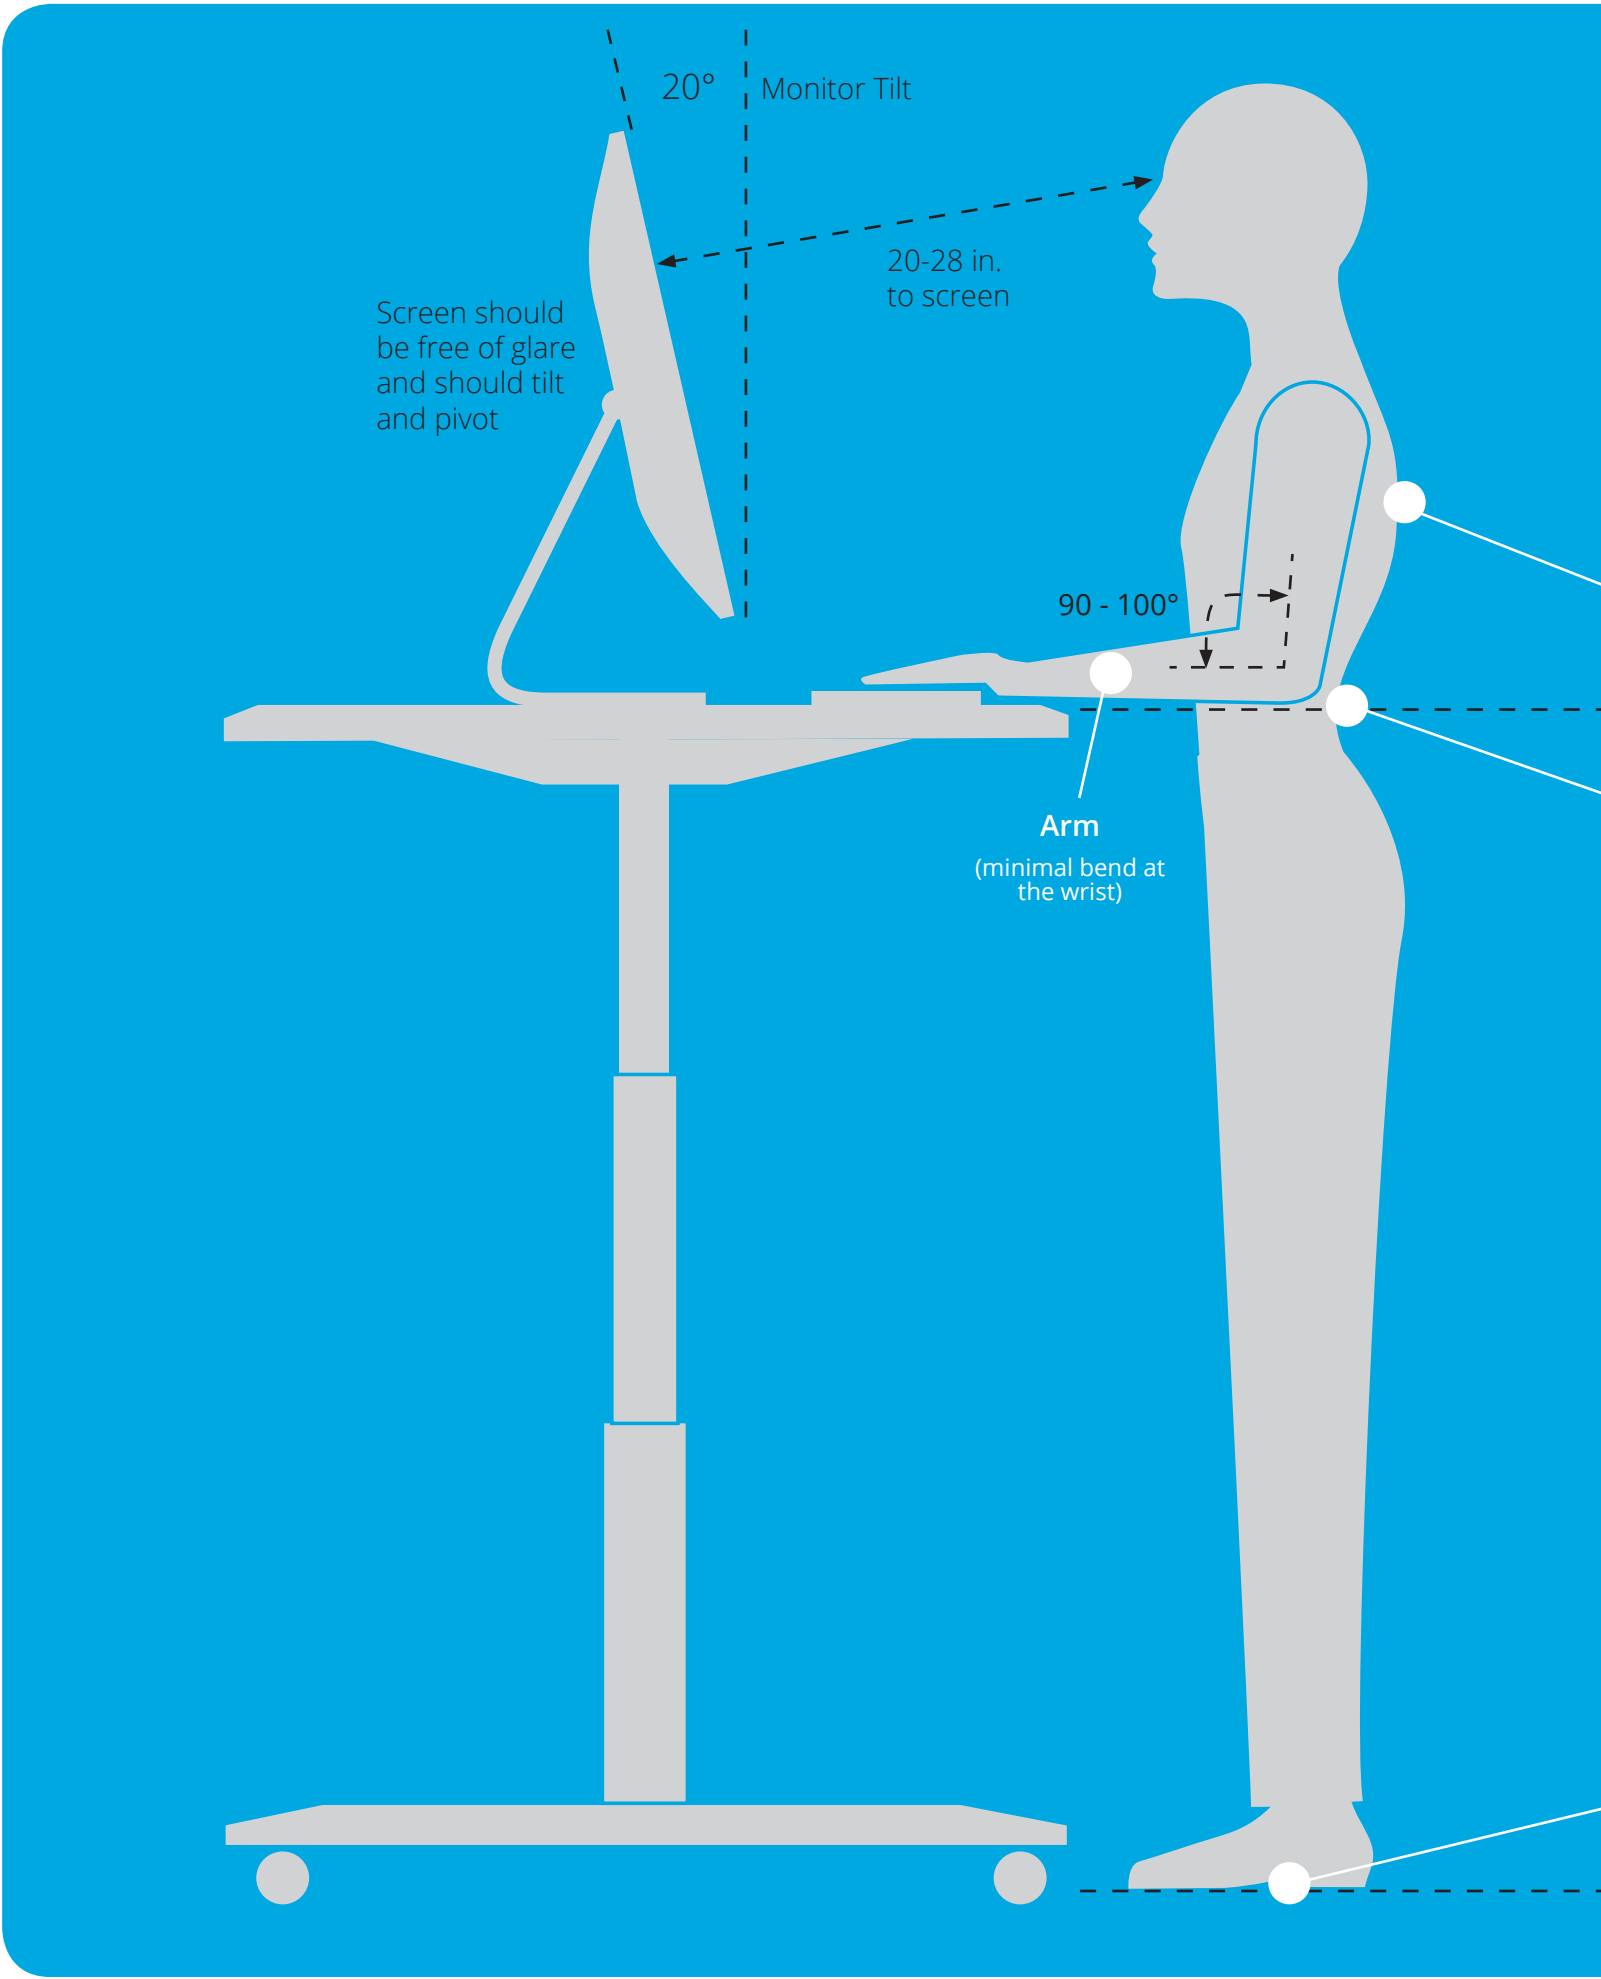

Simple to assemble and easier to use mobile tables, work stations and electric desks are a great choice for outfitting hospitals, clinics and other institutions.

Healthcare

Home Office

"My company is planning to order many more!"

Ergonomic Benefits

Being healthy begins with being comfortable. A “hunched” or bent-over posture and long-term, high-intensity typing sessions can lead to fatigue in the wrists and hands as well as possible pain. A standing desk mitigates these by rising up to support your natural standing position.

Desks can be adjusted to any height between their maximum and minimum height for optimal comfort. For the most comfort, we suggest lifting the table to elbow height.

All AIRLIFT® electric and pneumatic desks rise at least 40 inches high and offer the most range for the widest variety of users. The AIRLIFT® S2 rises to 48.4 inches or approximately 4 feet high. Upgrade to the AIRLIFT® S3 for a desk that rises higher (to 51.6 inches) and descends lower (to 25.6 inches) than any other AIRLIFT® sit-stand desk. That extra range ensures that shorter and taller people can comfortably use the desk their way.

Suggested Standing Position

Upper Back

(good posture)

Lower Back

Table height should be at or slightly below elbow height.

Sitting Bone

(distributed pressure)

Knee

(distributed pressure)

Behind Knee

(not touching seat)

Feet

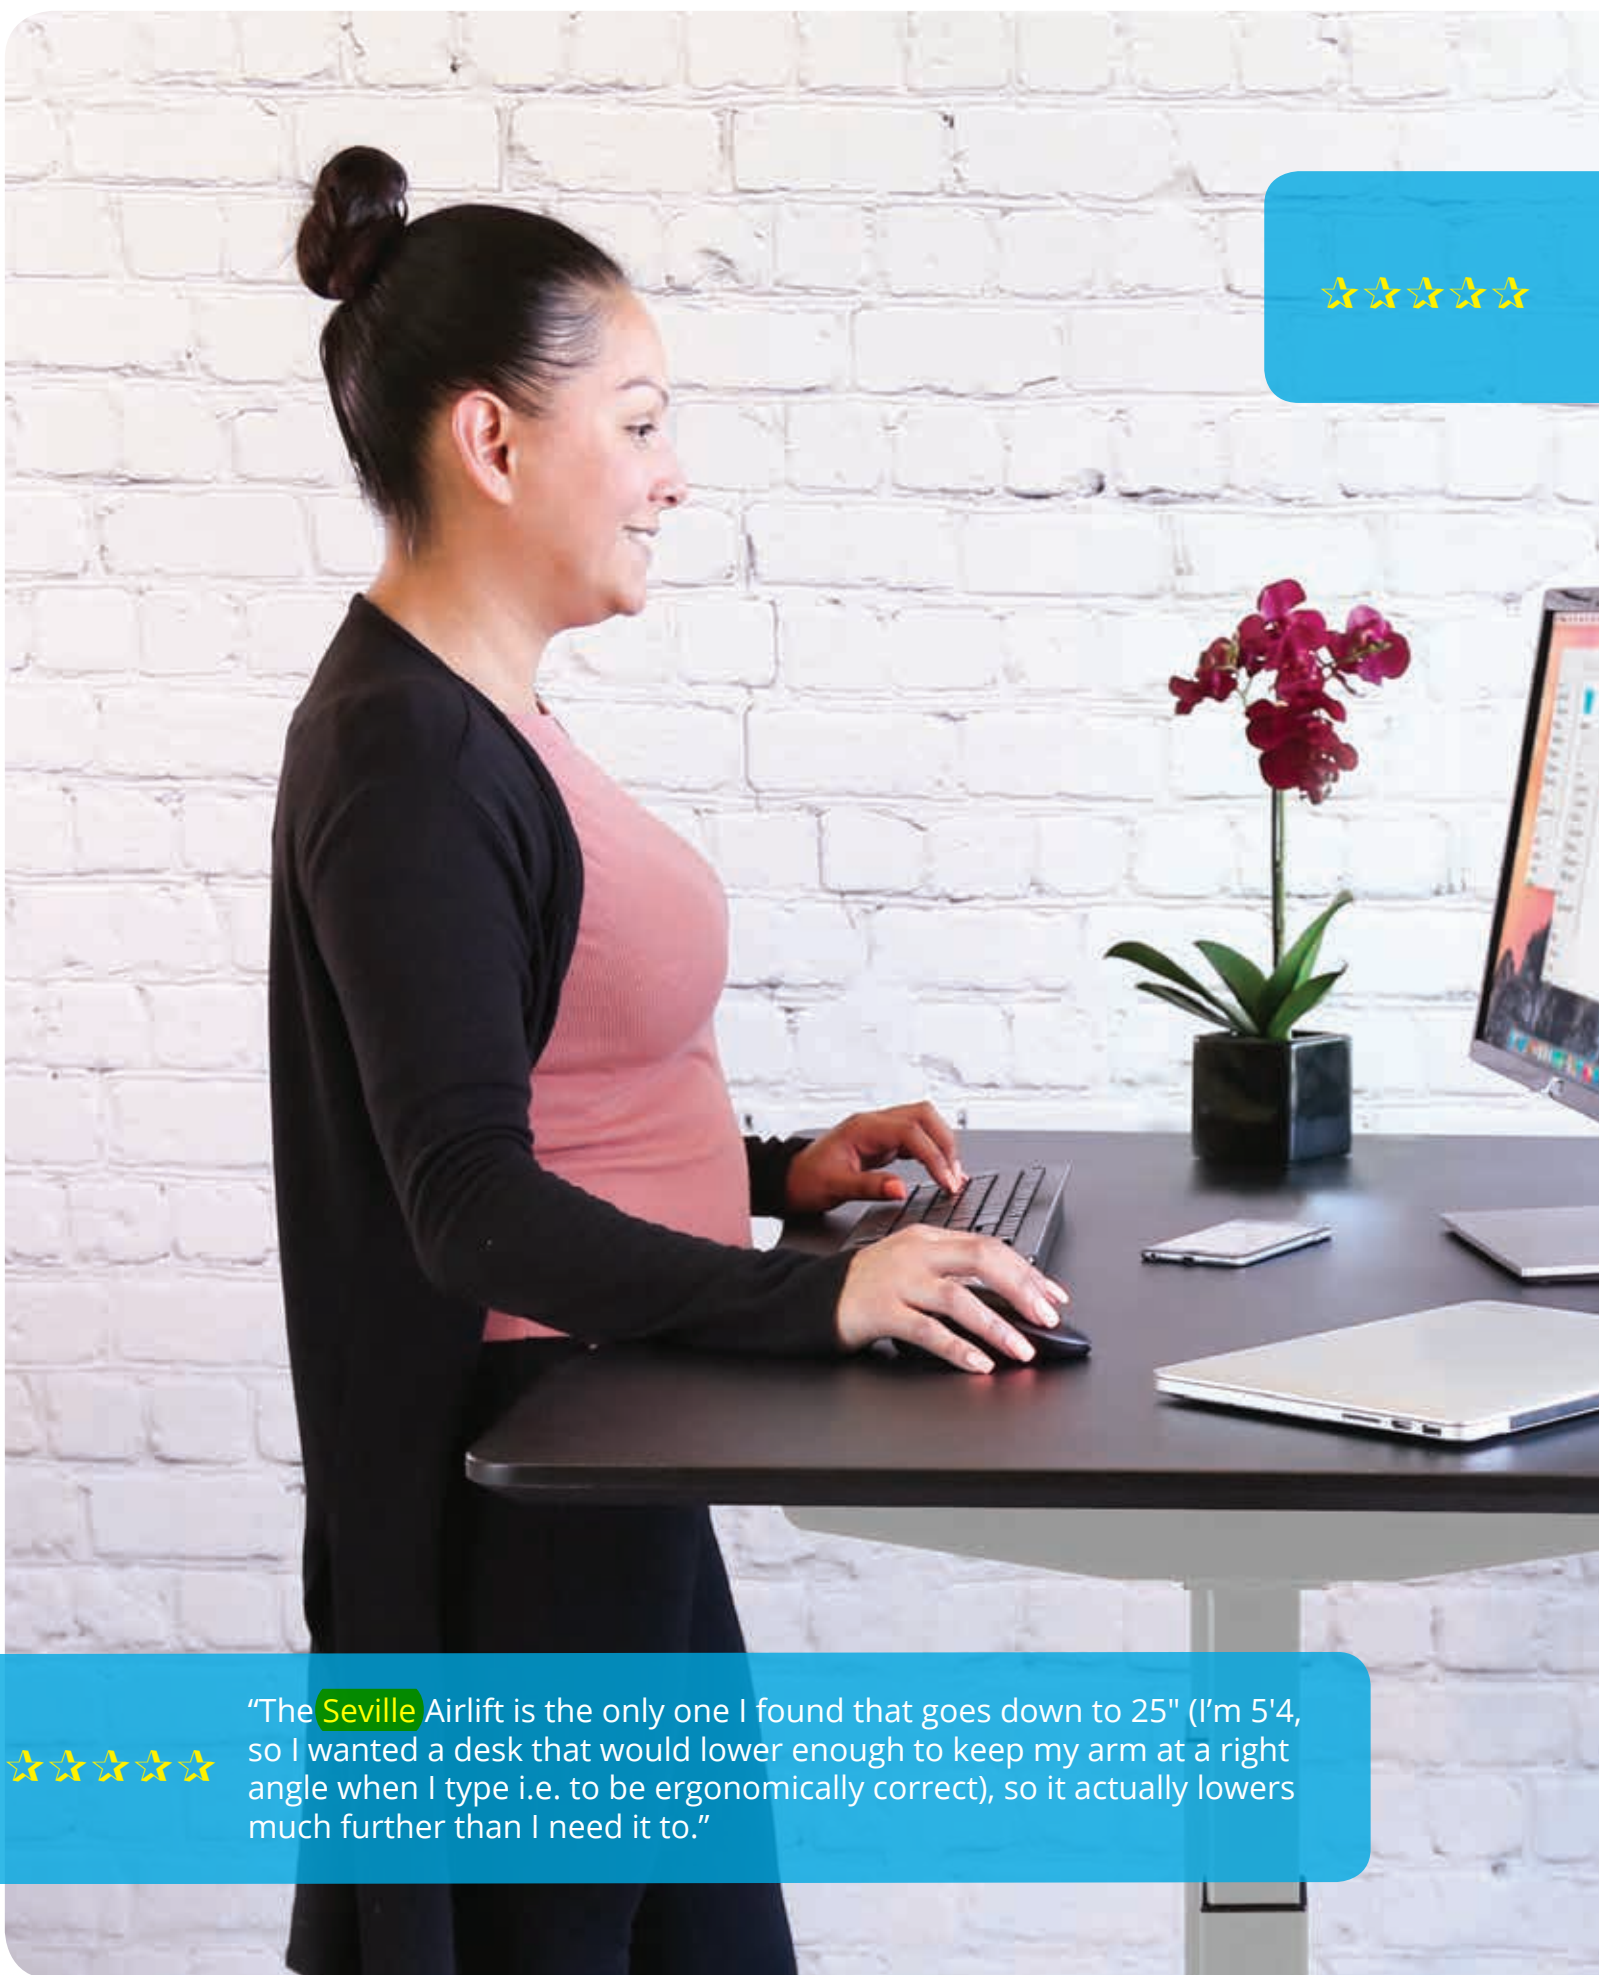

(flat on floor or footrest)

Suggested Sitting Position

90 - 100°

Arm

Table height should be at or slightly below elbow height.

★★★★★

★★★★★

"The **Seville** Airlift is the only one I found that goes down to 25" (I'm 5'4, so I wanted a desk that would lower enough to keep my arm at a right angle when I type i.e. to be ergonomically correct), so it actually lowers much further than I need it to."

Electric Height-Adjustable Standing Desks

"I am a tall guy (6') and I use it at 46" **standing** so the highest setting of 51" is more than tall enough for most people to work standing at the desk."

The AIRLIFT® S2 and S3 Electric Height-Adjustable Standing Desk series is designed to be elegant and easy-to-use. Available in a wide variety of color tops and base combinations, and designed for simple assembly and installation, the AIRLIFT® S2 and S3 series follows in Seville Classics' tradition of user-focused home and office products.

Powerful dual motors provide smooth movement when adjusting the top even while loaded. The all-steel base provides strength without sacrificing stability, speed, or durability. Lifting or lowering the desk is as easy as pressing a button. Store up to 4 heights on the digital memory controller for reliable readjustment through the day.

Our desks are topped with the AIRLIFT® Ergo Table Top. Work in comfort with the desk that curves around you for a more user-focused workplace. A sleek profile and ultra-durable laminate keeps the desk looking good when you're working hard.

Ergo Table Top

At its heart, the AIRLIFT® series is designed to promote healthy ergonomics and an active lifestyle, easily and beautifully. The table top blends smart design cues with comfort enhancing features like the smooth curving ergonomic edge.

“You” Focused Design

Be the focus of your workspace. The curved edge lets users pull in closer, making it easier to reach all corners of desk. More usable space means more utility when using wide screens or working with large objects.

Tops are constructed of MDF and finished with 3-D laminate in a variety of colors. Beveled bottom edges give the top a slim and elegant profile while also making the desk more comfortable to use while lowered.

All tops include pre-installed anchors for use with the AIRLIFT® S2 and S3 standing desks, and can be purchased together in the color combination of your choosing.

Be the center of your workspace with the AIRLIFT® Ergo Table Top.

Ergonomic Curve

Curved table top allows users to stand closer to the table while working for a more “you” focused workspace.

Tempered Glass Electric Standing Desk

OFF65873

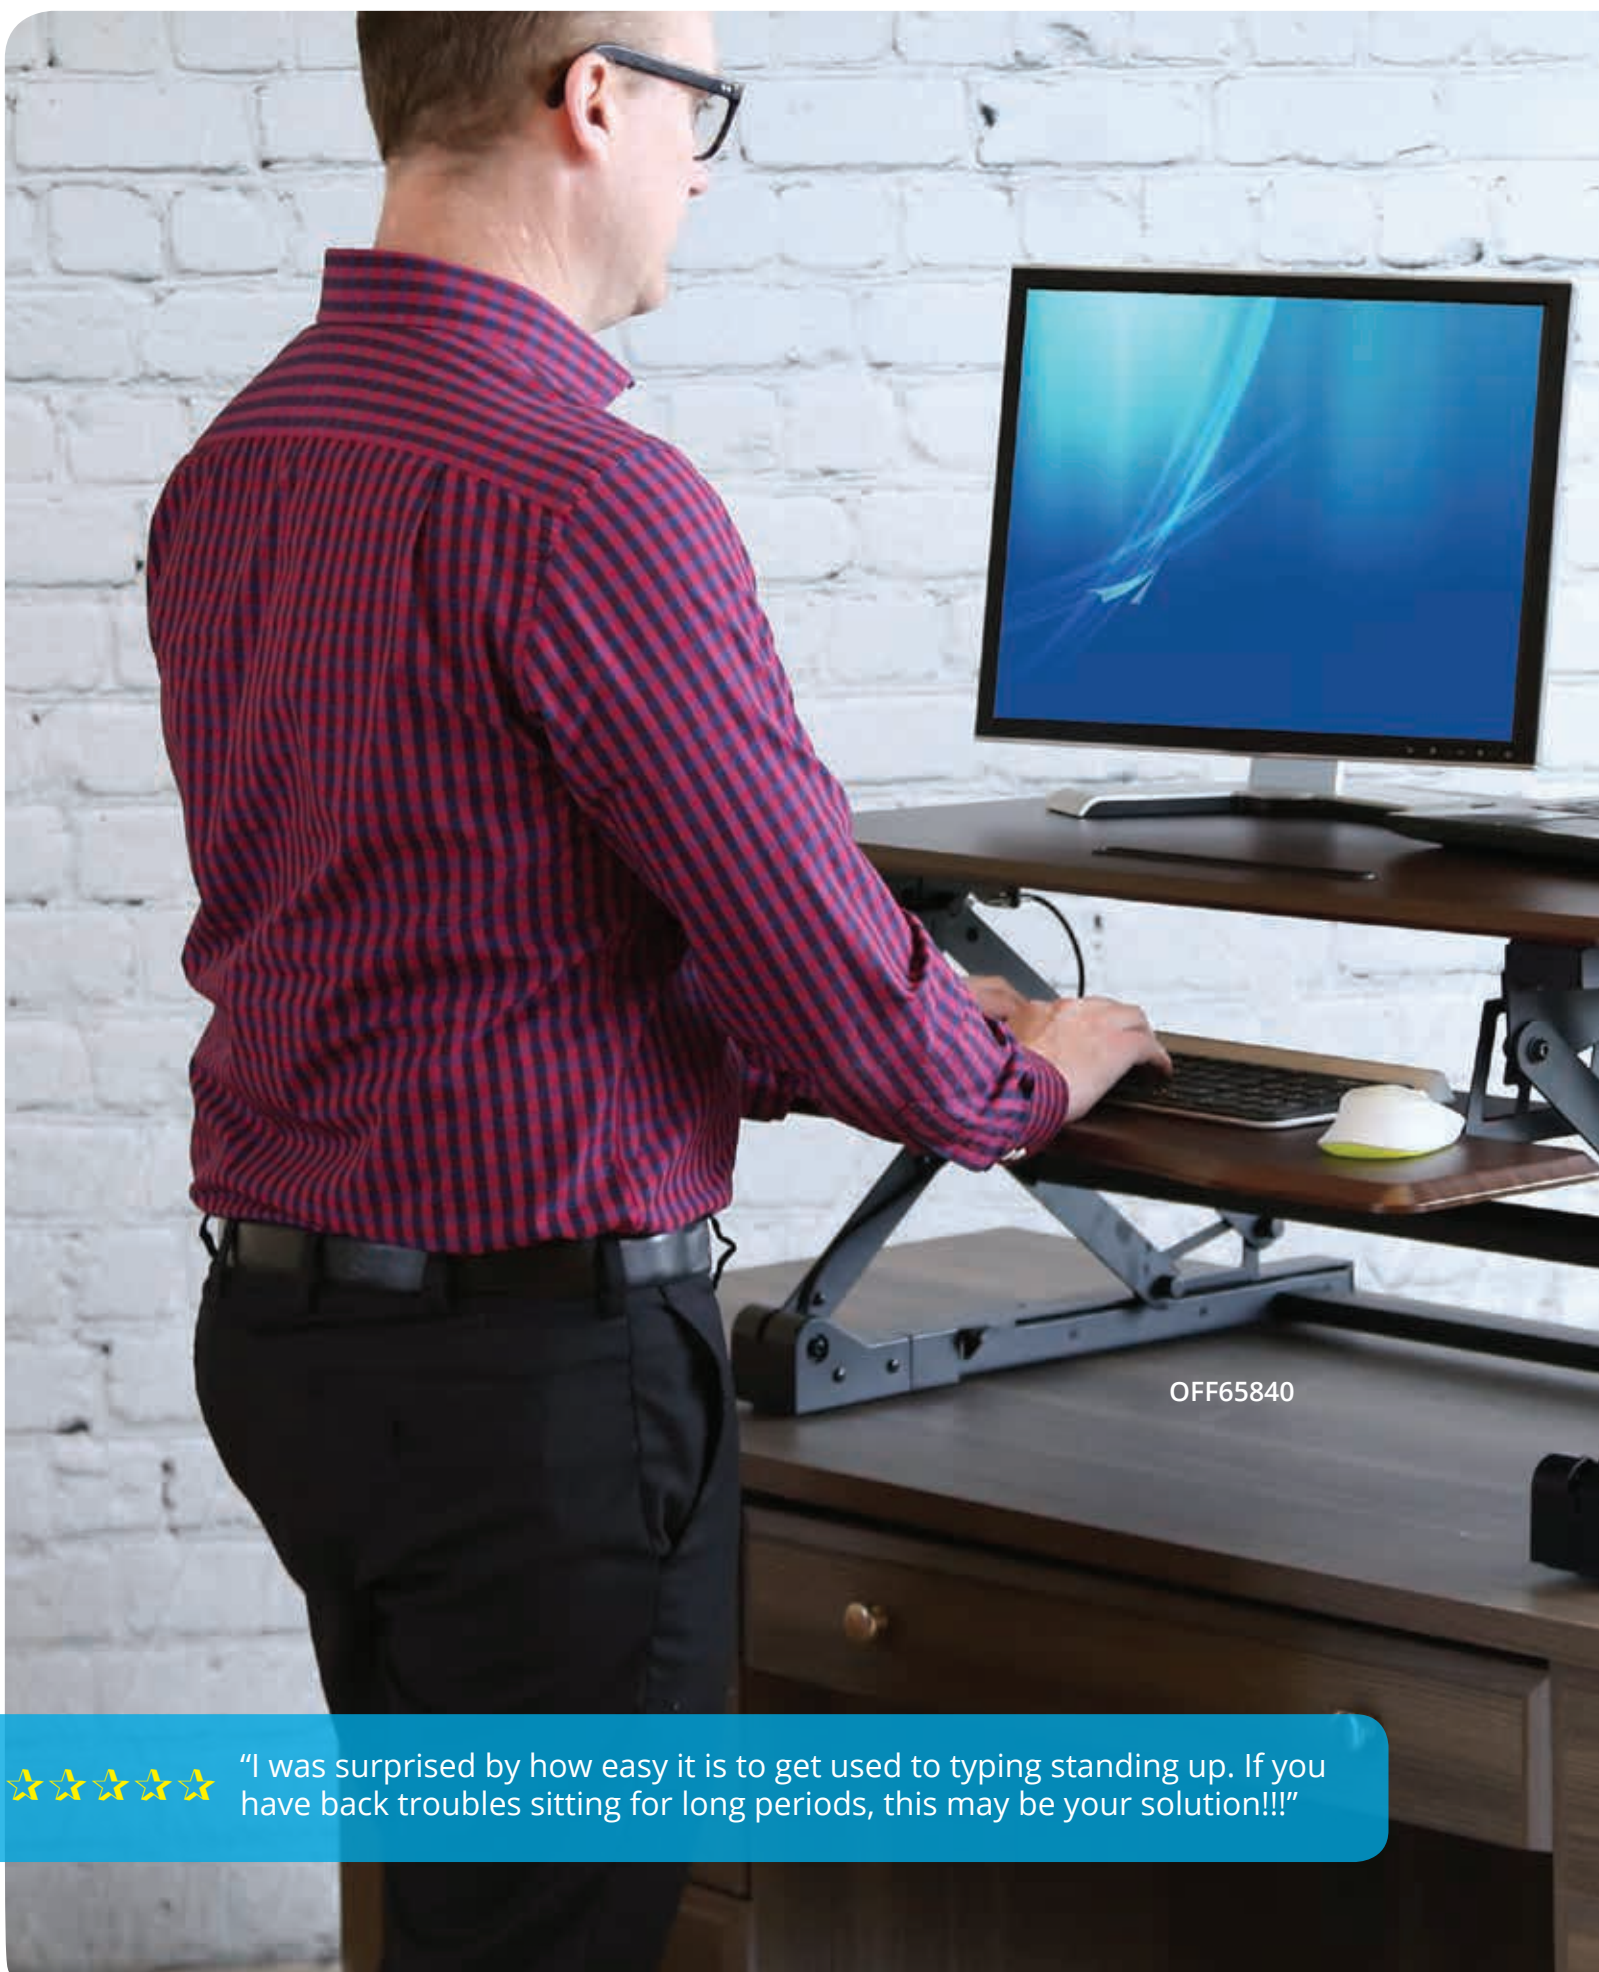

Take your room to the next level with the AIRLIFT® Tempered Glass Electric Standing Desk. Sophisticated modern design and useful high-tech features combine to create a futuristic piece of furniture that fits into your life today.

Brilliant tempered glass tops the desk for a beautiful work surface that's safe and easy to clean. A storage drawer beneath the top features built-in divider. A touch-sensitive control panel stores up to 3 height settings for instant adjustment to your chosen height throughout the day. Heavy-duty steel legs and dual motors effortlessly lift the top from sitting to standing height with the touch of a button.

Keep your smart devices powered up with the dual USB charging ports. Each port delivers a full 2.4 amps to smartphones and other devices without the need for high-speed charging. Use it as an outlet for USB powered accessories like speakers, desk fans, lights and more!

"I was surprised by how easy it is to get used to typing standing up. If you have back troubles sitting for long periods, this may be your solution!!!"

Gas-Spring Standing Desk Converter

Easily transform any desk into a height-adjustable workspace with the AIRLIFT® Gas-Spring Standing Desk Converter. We've designed the AIRLIFT® workstations to be easy to setup and easier to use. No plugs, no buttons, no hassle. Simply unpack and get to work.

Go with the AIRLIFT® Gas-Spring Standing Desk Converter for a fast and easy height-adjustment option. A simple pull of the AIRLIFT® levers lets the top vertically lift more than 13 inches with minimal setup. Install the included keyboard tray to turn the converter into a fully-functional two-tier workstation, perfect for offices and desktop computing environments.

Top is designed with a built-in stand to keep your smart devices visible (and accessible) while you work. AIRLIFT® sit-to-stand desktop converters are large enough to fit dual monitors, monitor + laptop, and ultra-wide monitor setups.

Designed to be used with desktop computers and in office spaces, each desk includes a keyboard tray and clips for wire management. Make the professional choice and upgrade your office with AIRLIFT®.

or a wider desk."

Gas-Spring Corner Standing Desk Converter

Upgrade your office the compact AIRLIFT® Gas-Spring Corner Standing Desk Converter Riser. We designed this desk with a triangular top perfect for use in cubicles, corner offices and at home. Work in comfort without losing productivity. Upgrading with AIRLIFT® is easy: simply unpack and get to work.

Enjoy an ultra-wide 43 inches of workspace, perfect for multiple monitors. A simple squeeze of the AIRLIFT® gas-spring levers lifts the desk by up to 13 inches quickly. Use the built-in stand to prop up papers, smartphones and tablets while you work for quick reference. Attach the optional keyboard tray for a robust computer workstation fit for professional users.

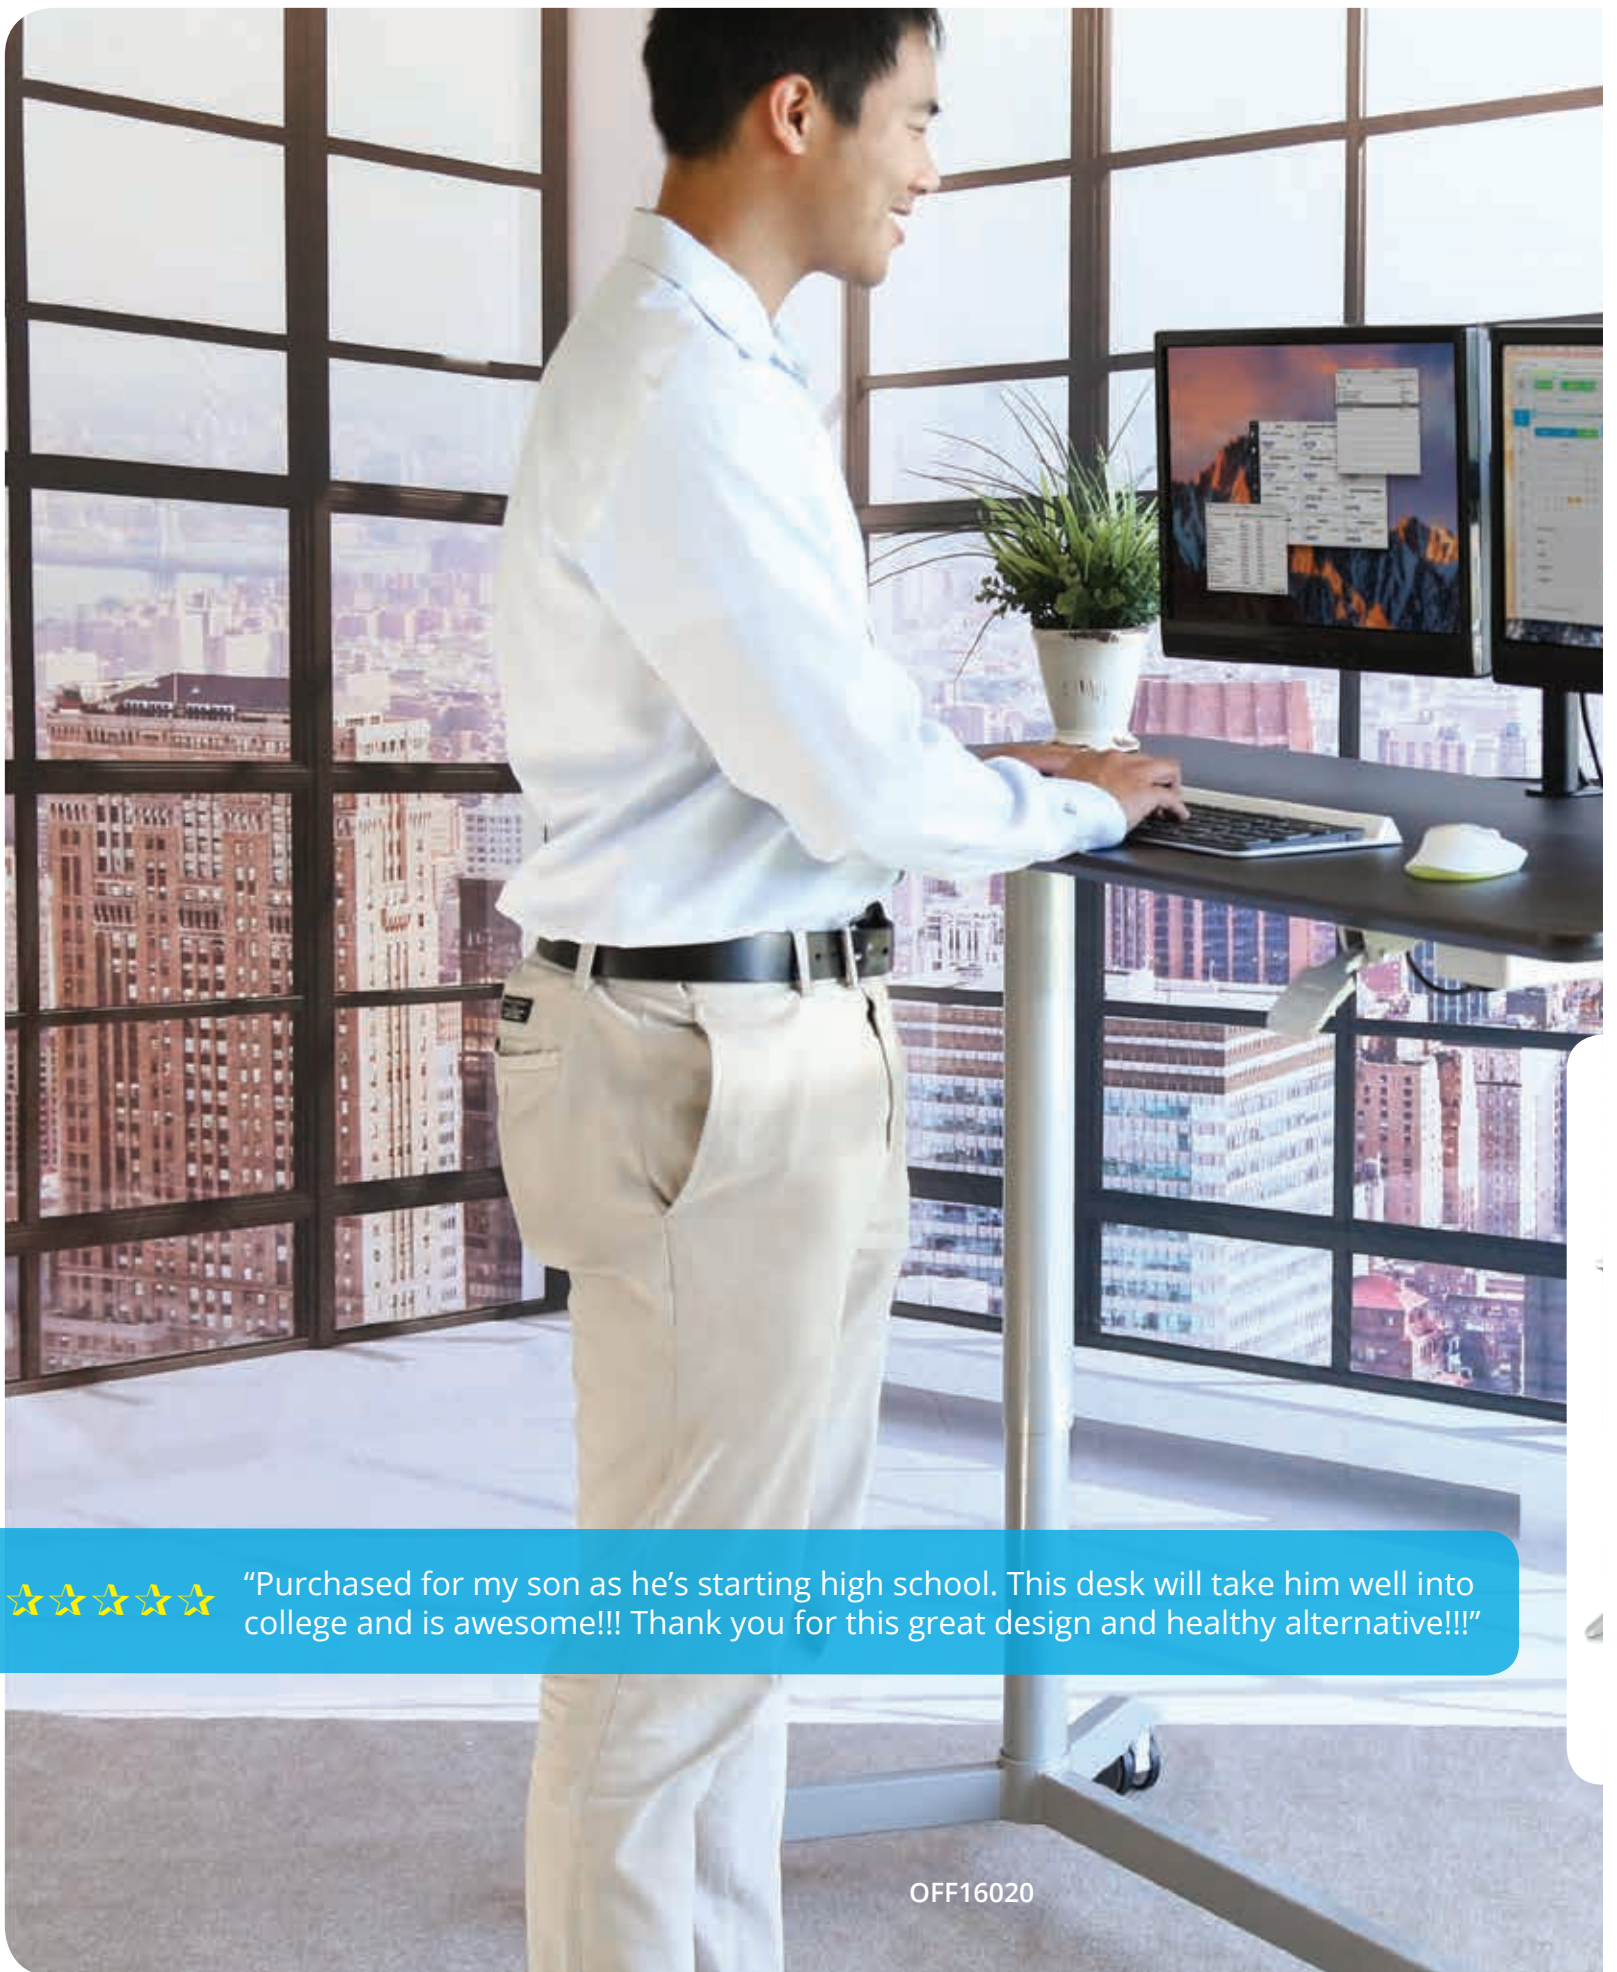

Offices are a major source of sedentary behavior as most workers spend their time sitting. Fight the worst effects of sedentary behavior where it starts. Stand up for your health. Live well. Live AIRLIFT®.

Instant Adjustment

Quick and smooth height-adjustment is an AIRLIFT® lever away. A pneumatic cylinder provides the lift when it's time to raise the desk. Adjust from the minimum to the maximum height in roughly one second. Or, take your time and get the height just right for your ideal workspace.

OFF65855

airLIFT® Manual Height-Adjustable Desk

Meet the desks that started it all. Mobile, height-adjustable, sturdy, Seville Classics' mobile laptop desks are the standard for manually height-adjustable personal desk solutions.

We designed these desks with your home in mind. Low-profile desk bases are designed to tuck underneath furniture for comfortable use while sitting.. Wheels ensure the desks go where you do, while locking casters ensure the stay put when you need them to.

Keep it simple with the original Mobile Laptop Desk. Need more adjustability? Upgrade to the Tilting Mobile Laptop Desk Cart for a desk with an adjustable top that's perfect for use with laptops or as a music stand, podium and more. Lastly, the Sit-Stand Desk Cart with Side Table offers the most range of any manual sit-stand desk, rising to 40 inches high. It's the perfect height for use while standing and combines mobility with tilting and stationary tops for a simple, but sophisticated, rolling workstation.

Bases are constructed of solid-steel for stability and durability and finished in either satin bronze, or pewter. Tops are composed of MDF with 3-D laminate in a variety of finishes. Assembly is easy with all required tools included.

"I bought three rounds of these for my classroom. They are easy to assemble, move around, adjust in height and look great."

How Are We Different?

With AIRLIFT®, Seville Classics improves on the formula it started with the original Mobile Laptop Desk Cart. We created a desk that was easy-to-assemble, easy-to-use, and easy-to-own, while retaining high-quality construction and materials. The AIRLIFT® series expands on what made the original so great. AIRLIFT®

desks are even easier to assemble, with fewer steps. Pneumatic and electric adjustment makes switching heights effortless. We offer desks in a variety of materials from aluminum to MDF, steel and beyond. Contemporary laminate finishes give our tops improved durability against scrapes and bumps in beautiful finishes that suit your home or office.
