

Objective

Bring the alerts and notifications for Norton Cloud Backup into compliance with the updated design system and style guide created for the Norton 360 desktop app. This was part of a larger project that included all the alerts for the entire Norton 360 app (more than 300 alerts.)

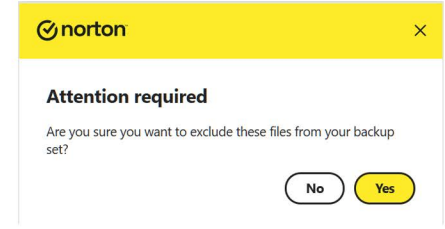

Alert Samples

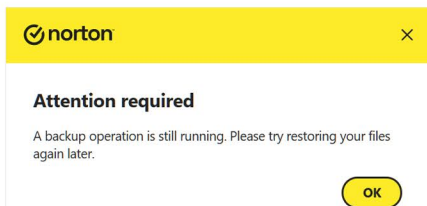

Appears when backup window is open.

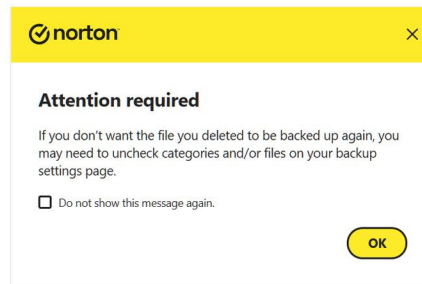

Appears when a backup set is set up without at least 1 file.

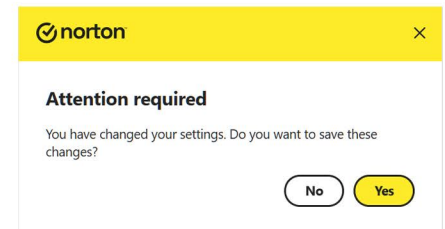

Appears as confirmation when excluding files from a backup set.

Appears when user attempts to restore files while a backup is in progress.

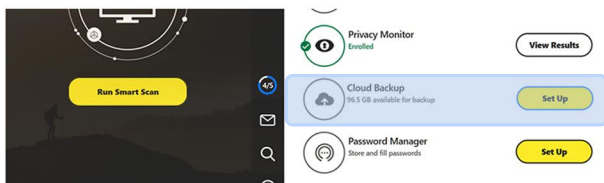

Appears when the user deletes a backed up file that may still be included in a backup set.

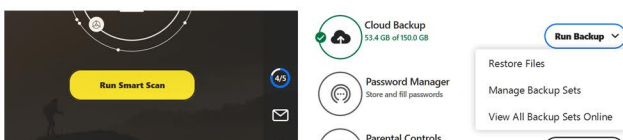

Appears to confirm a setting change.

Cloud Backup Setup

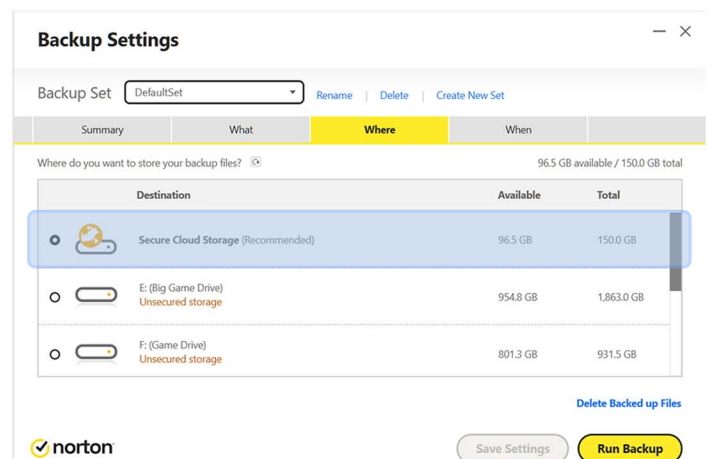

User clicks **Set Up** next to "Cloud Backup" to configure their first backup and set a schedule.

If "Secure Cloud Storage" is selected as a backup destination, the dashboard will reflect available cloud storage and provide options for interacting with cloud backups.

Secure Cloud Storage

Users can select "Secure Cloud Storage" to backup files to the cloud, or they may backup to a local volume.
